🐙 @noidilin

Basics

- Frontend engineer with a finance background and strong foundations in analytical thinking, systems reasoning, and project delivery
- Built user-facing products and internal tools with modern React-based stacks, focusing on maintainable architecture, reliable UX, and scalable frontend workflows
- Develops maintainable interfaces with strong attention to type safety, localization, responsive behavior, and reliable UX
- Brings cross-disciplinary experience in design, motion, and real-time 3D production to create polished interfaces with strong visual clarity

Work

Alion Tech

Contract Front-End Engineer

Nov 2025–Present

- Delivered frontend features across admin dashboards and customer-facing web apps for Japanese B2B products
- Modernized an admin platform with Next.js 16, React 19, Tailwind v4, shadcn/ui, and Storybook, improving maintainability, type safety, and scalability for ongoing development
- Built admin workflows for data management and financial operations, including advanced tables, CSV/PDF export, batch actions, payment-detail forms, and permission-aware interactions
- Developed customer-facing flows for payments, account settings, support inquiries, password reset, and receipt/PDF generation with reliable auth and session handling
- Integrated typed APIs, localization, and real-time messaging to keep complex UI behavior consistent with product requirements

Keywords: Next.js, React, TypeScript, Tailwind CSS, shadcn/ui, Storybook, TanStack Query, Zustand, Firebase, next-intl, Axios, Snapdom

Freelance Motion Designer

<https://go.noidilin.dev/design>

Real-time 3D & Motion Designer (Unreal/Blender) / Colorist

Oct 2020–Present

- Delivered freelance real-time 3D, motion, and color work in parallel with product-focused frontend development
- Built real-time 3D scenes and interactive environments with Blender and Unreal Engine for 15+ freelance projects
- Developed repeatable asset and rendering pipelines with procedural modeling, shader nodes, and automation to improve production efficiency
- Applied lighting, color management, and visual-system thinking to produce polished client-facing outputs

Keywords: Unreal Engine 5, Blender, Omniverse, Real-time Rendering, Procedural Modeling, ACES / Color Management, BIM & IFC Industry Open Standard, DaVinci Resolve Color Grading

Education

National Taiwan University

<https://management.ntu.edu.tw/en/Fin>

Bachelor, Finance

Sep 2014–Jun 2019

- Applied Python to automate analysis workflows across business, supply chain, and finance use cases
- Conducted financial modeling and risk analysis using real company data for decision-oriented reporting
- Built a foundation in analytical thinking, structured problem solving, and data-backed communication

Skills

Front-end: Advanced

Keywords: HTML/CSS/JavaScript, TypeScript, React, Next.js, SSR/SSG/ISR, shadcn/ui, Responsive Design, Accessibility

State & Data: Advanced

Keywords: TanStack Query, Zustand, React Hook Form, Zod, Axios, Typed API

Integration, Localization

UI Engineering: Advanced **Keywords:** Figma MCP, Storybook, Tailwind CSS, Design Systems, Component Architecture, PDF / Export Workflows

DevOps: Beginner **Keywords:** Linux, Docker, GitHub Actions

Creative Technology: Expert **Keywords:** Three.js, Blender, Unreal Engine 5, Omniverse, Motion Design

Projects

Misegoto

Jan 2026–Present

- Rebuilt a Japanese B2B admin dashboard with Next.js 16 and React 19 using localized routing, responsive layouts, and reusable UI primitives
- Implemented advanced table workflows with filtering, export, batch actions, and permission-aware interactions for operations-heavy use cases
- Built receipt and document generation flows, including browser-side PDF export and payment-related UI for customer-facing journeys
- Integrated Firebase-backed real-time messaging and typed API data flows to keep operational tooling responsive and predictable

Keywords: Next.js, TypeScript, shadcn/ui, Storybook, Mantine, TanStack Query, Zustand, Firebase, Localization, B2B SaaS

eye チェック

Oct 2025–Present

- Built a Japanese Next.js and React assessment platform covering registration, test-taking, and reporting flows
- Implemented OTP verification and session handling for paid user journeys and admin access control
- Developed token-driven test interactions with resilient loading/error states and Zustand-based state management
- Built reporting views with deep-linked pagination and PDF export via react-pdf, including CJK font support and deterministic filenames

Keywords: Next.js, TypeScript, shadcn/ui, Zustand, React Hook Form, Zod, Axios, Sentry, react-pdf

Everflow

Dec 2025–Present

- Shipped production features in a large Vue 3 and TypeScript admin dashboard using SFC/TSX, Pinia, and a generated OpenAPI client
- Built admin tooling for promotional workflows with search, sort, date filters, status controls, permission-gated actions, and a safe cancellation flow
- Developed customer detail views with resilient empty states, localization via vue-i18n, and typed API integration for consistent product behavior

Keywords: Vue 3, TypeScript, Vite, Pinia, Vue Router

Achroma Color Theme <https://marketplace.visualstudio.com/items?itemName=noidilin.color-fatigue>

Mar 2025–Present

- Designed an editor and terminal color theme with muted hues and a clear tonal hierarchy for long-session readability
- Built a syntax highlighting system that stays visually consistent across VS Code, Neovim, and CLI environments
- Automated multi-platform theme generation and palette synchronization to streamline maintenance and releases

Keywords: VS Code Extension, Developer Tooling, Design Tokens, Theming Systems

Languages

English: Full Professional Proficiency

Keywords: TOEIC 985

Chinese: Native or Bilingual Proficiency

Interests

OS Ricing: Arch Linux (BTW), Omarchy, Neovim

Data Visualization: Three.js, GSAP
